**10th International Symposium on Ultrasonic Doppler Methods for Fluid Mechanics
and Fluid Engineering (ISUD 10)**
September 28-30, 2016, Tokyo, Japan

by Hiroshige Kikura

The 10th International Symposium on Ultrasonic Doppler Methods for Fluid Mechanics and Fluid Engineering (ISUD 10) was held at Tokyo Institute of Technology, Tokyo, Japan from September 28 to September 30, 2016. The supporting organizations of this symposium were Laboratory for Advanced Nuclear Energy Tokyo Institute of Technology and the Visualization Society of Japan. The symposium was also sponsored by MET-FLOW SA, Ubertone, JAPAN PROBE, Flow-Viz AB, Kyokuto Boeki Kaisha, Ltd., and FlowBiz Research Inc..

The main focus of this symposium is to bring scientists, engineers, researchers, and students from the fields of ultrasonic technology and facilitate them for an exchange of the new innovations and ideas on a utilization of measurement devices based on pulsed ultrasonic Doppler. The symposium is held every two years and ISUD 10 was attended by 62 academics and professionals that came from 10 countries. The

number of participating researchers keeps increasing for each time the biennial symposium is held. This shows accretion of interest on ultrasonic technology from all over the world.

There were 2 keynote lectures, 1 special lecture, and 37 technical oral presentations were presented in

To Join ICeM:

Everybody, who is interested in Multiphase flow, is welcome to join ICeM. Please contact one of the following board members to register in ICeM member.

ISUD10. The keynote lectures were given by the following invited speakers: Dr. Robert Malkin (University of Bristol) and Prof. Yoshikazu Koike (Shibaura Institute of Technology). In addition, Prof. Gen Endo from Tokyo Institute of Technology was invited to provide a special lecture entitled “Access Technology Using Robot for Decommissioning Tasks in which Integration of Robotics and Ultrasonic Doppler Method”. The 37 papers were divided up into 6 technical sessions: Applied Flows, Next Generation UVP, Signal Processing and Methodology, Flow Metering and Flow Mapping, Fundamental Flows, and Environmental Flows.

The symposium began on Wednesday morning (September 28) with the opening presentation about UVP history and future which was delivered by Prof. Takeda, a pioneer of ultrasonic measurement in the fluid engineering field, followed by a first keynote lecture by Dr. R. Malkin. He presented an outstanding presentation of his paper, “Non-destructive Inspection and sub-wavelength characterization”. Then followed by first technical session and welcome reception. The second day on Thursday began with the second keynote lecture. On the second keynote lecture, Prof.

Yoshikazu Koike presented his research entitled “Positioning and navigation for free-fall type underwater observation system”, he had enlightened the measurement in the deep sea, and were followed by technical session the rest of the day with memorable evening dinner on Yakabutane Cruising around famous area in Tokyo, Asakusa. Last day on Friday, last 2 technical sessions was held and followed by a special lecture from Prof. Endo. The closing session which was delivered by Prof. Kikura and Prof. Windhab. Among 12 students’ presentations, the scientific committee had evaluated the papers and the oral presentations. The winner of the Ubertone Student Award was Mr. Damien Dufou from ETH Zürich. Last but not least, after the closing ceremony, all participants had an opportunity to join a laboratory tour in Laboratory for Advanced Nuclear Energy Tokyo Institute of Technology.

10th Japan-Korea Symposium on Nuclear Thermal Hydraulics and Safety (NTHAS10) November 27-30, 2016, Kyoto, Japan

by Tomoaki Kunugi

The 10th Japan-Korea Symposium on Nuclear Thermal hydraulics and Safety (NTHAS10) was held from 27-30, November 2016 at Mielparque Kyoto, Kyoto, Japan. This symposium was founded and has been organized by the thermal hydraulics divisions of the AESJ and the KNS in two neighbor countries. Since the first symposium (NTHAS1) in Busan, Korea in 1998, NTHAS has provided a unique opportunity to discuss up-to-date technical information and to interact with colleagues from the neighboring countries. The second to ninth meetings were held in Fukuoka (2000), Gyeongju (2002), Sapporo (2004), Jeju (2006), Okinawa (2008), Chuncheon (2010), Beppu (2012) and Buyeo (2014) with great success in technical quality and number of participants.

More than 180 researchers participated in the NTHAS10. NTHAS10 covered wide range of the

topics on nuclear thermal hydraulics and safety: Track1: Two-Phase Flow Experiments and Analysis, Track2: CFD and V&V, Track3: Severe Accident Experiments and Analysis, Track4: Hydrogen Behavior and Combustion, Track5: Water Reactor Thermal Hydraulics and Safety, Track6: Liquid Metal Reactor Thermal Hydraulics and Safety, Track7: Gas Cooled Reactor & Fusion Reactor Thermal Hydraulics and Safety. The technical program committee selected 102 presentations, invited 2 Plenary lectures and 4 Keynote lectures.

In the banquet, “Geiko(Geisha)” and “Maiko” were invited. At the beginning of the banquet, they played the traditional dances and after that, most of the participants enjoyed the talks with them during the dinner (Photo 2).

In the closing session, four panelists addressed their opinions regarding “Perspectives of Japan-Korea nuclear engineering network and NTHAS” and was discussed with the audiences. Finally, the candidate site of next NTHAS in Korea was announced.

Finally, I would like to thank to all the Organizing Committee members, Technical Program Committee members and Local Organizing Committee members in both countries.

Obituaries

It is with deep sadness that we inform you that **Professor Iztok Žun** (University of Ljubljana) passed away on October 22, 2016 at the age of 70, and that **Professor Ulrich Müller** (Karlsruhe Institute of Technology) passed away on January 27, 2017 at the age of 82.

We would like to express our sincere appreciation for their enormous contributions and to offer our deepest sympathies.

BACKGROUND

After enthusiastic responses to the past nine ISMTMFs held in Nanjing (1995), Beijing (1998), Fukui (2001), Hangzhou (2004), Macau (2006), Okinawa (2008), Tianjin (2011), Guangzhou (2013) and Sapporo (2015), the 10th International Symposium on Measurement Techniques for Multiphase Flows (ISMTMF) will be held in Hong Kong from December 3 to 7, 2017. The focus of this symposium will be on the latest progress in the development of measurement techniques for multiphase flows and exchanging new information among scientists and engineers working in universities, industries and other fields.

This symposium aims to provide an international forum for presentation, exchange of ideas and creation of knowledge in recent advances on various aspects of theories, analyses, and applications of measurement techniques in complex multiphase/multicomponent flows. The focus of this symposium is to report the latest progress in developing measurement techniques for multiphase flows and exchanging new information among scientists and engineers working in universities, industries and other fields. It will bring together researchers and practitioners from academia, research institutions and industry to exchange experiences, disseminate up-to-date information, and explore new opportunities in the field; in particular, it will expose young or new researchers to the state of the art in the field by means of the symposiums. It is anticipated that the 10th International Symposium on Measurement Techniques for Multiphase Flows-2017 (ISMTMF 2017) will provide an opportunity for stimulation of the researchers as well as for furthering cooperation among the investigators in the field of advanced Multiphase Flow Measurement Techniques.

CALL FOR PAPERS

ISMTMF'17 will focus on the following topics (include but not limited to):

- Fundamentals of multiphase flow measurement techniques and experimental methods
- Novel sensors and measurement methods of multiphase systems
- Information technology for multiphase flow
- Process tomography and flow visualization
- Intelligent instruments and monitoring systems

- Optical, non-intrusive and other advanced measurement techniques
- Micro/nanoscale multiphase flow measurement techniques
- Bio-multiphase flow measurement techniques

Selected papers from ISMTMF'17 will be further reviewed and published in special issues of *Measurement Science and Technology*, *International Journal of Multiphase Flow* and *Case Studies in Thermal Engineering*.

ABSTRACT SUBMISSION

Papers will be selected based on one page abstracts (A4, single space, Times New Roman letters of 10 font size) including results and figures. Papers submitted should include the title of the paper, authors' names and affiliations, a concise statement of the problem, method of approach, results and discussion, and conclusions. Please identify the corresponding author. Electronic submissions are strongly encouraged. Template is available from the symposium website (<http://ismtmf2017.ust.hk>) which will be available in March 2017. Please submit your abstract in a Word or PDF format to the ISMTMF'17 Secretariat via ISMTMF'17 website (online submission) or e-mail. The file size is limited to 5MB.

Hong Kong

Hong Kong is simply dazzling. Experience the distinctive blend of East and West in this dynamic city. Feel the rush as you indulge in shopping. Savour culinary delicacies. Open your senses to Hong Kong's amazing skyline, bustling harbour and peaceful countryside.

Take a tour and enjoy diversity and excitement at every turn in Hong Kong. Whether by cruise, by day or by night, every tour will captivate you and dispel the belief that Hong Kong is all skyscrapers and shopping malls. Or put on your walking shoes and explore the streets of Hong Kong with our handy Hong Kong Walks section. Interested in the heritage and culture of Hong Kong? We have great informative tours for you. If you want to get off the beaten track, try a tour to the Outlying Islands or a hiking tour, including one to the trail that Time Magazine calls the best urban hike in Asia. Come discover the diversity and sophistication that is Hong Kong. You'll love it!

Accommodation Information

Conference Hotels:

- Crowne Plaza Hong Kong Kowloon East
- Holiday Inn Express Hong Kong Kowloon East

The symposium will also reserve some rooms in the Conference Lodge at HKUST campus where is near the Institute of Advanced Studies (IAS) at HKUST.
